# Shubhra Kanti Ghosh

## Java Backend Developer

### PROFESSIONAL SUMMARY

Dynamic Full Stack Developer with strong technical skills, self-discipline, problem-solving passion, and effective communication, eager to bring quick-learning and relentless drive to your team.

### WORK EXPERIENCE

#### Omniful Technologies Private Limited

Software Engineer  
September 2023 - May 2024

##### Job responsibilities:

- Led the integration of major e-commerce platforms (Shopify, Pik, OpenCart, BigCommerce, WooCommerce) to ensure seamless synchronization of orders, products, and inventory, and developed backend features like order status mapping, CSV-based order creation, and Slack notifications for manual synchronization.
- Implemented real-time feedback mechanisms for product creation via CSV sheets using Pusher, developed rate limiting mechanisms to optimize API usage, and maintained comprehensive logs for auditing and troubleshooting.troubleshooting.

#### Omniful Technologies Private Limited

Software Engineer Intern  
February 2023 - August May

##### Job responsibilities:

- Led successful integrations with major e-commerce platforms, enhancing system synchronization, API collaboration, and innovating features like order status mapping and Slack notifications for improved workflows.
- Developed real-time feedback mechanisms using Pusher for CSV-based product creation, optimized SKU management, implemented rate limiting for APIs, and maintained logs for auditing and troubleshooting to ensure performance and reliability.
